^{a/} Micro, small, medium and large strata, were defined according to the Diario Oficial de la Federación from December, 30th 2002. The total amount of percentages may not be the same as the great total, due to rounding.

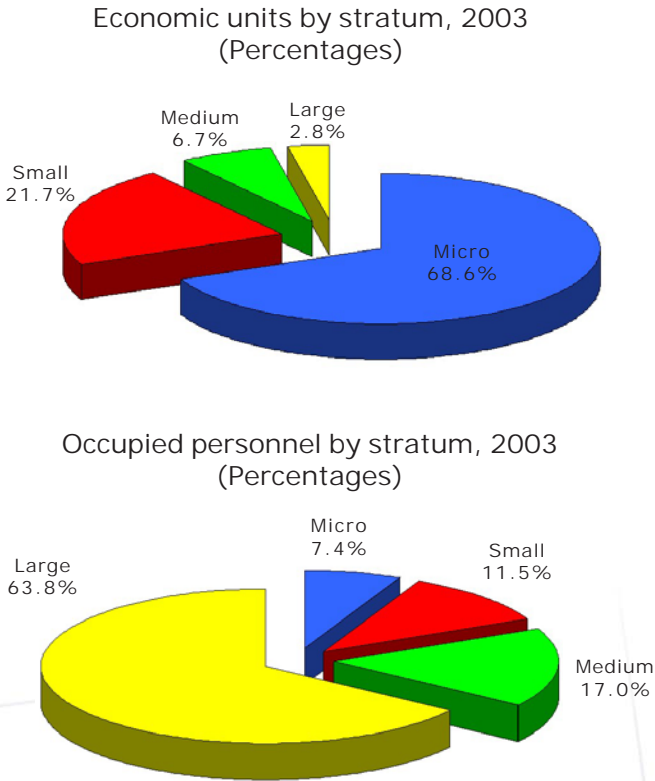

Censos Económicos 2004

INEGI is specially grateful to all the people, governmental authorities and businesses who took the time and effort to collaborate with this project which reinforces the national statistics data, derived from the 2004 Economic Censuses.

Stratum

Information about occupied personnel organized by stratum shows that micro establishments engaged 68.6% economic units and 7.4% employees from the total in both cases.

On the other hand, large establishments reported 2.8% of economic units and 63.8% people hired, each one from the total also.

Water supply, treatment and distribution activities
General results

Water supply, treatment and distribution activities are achieved by economic units which also include sewage treatment.

According to the North American Industry Classification System (NAICS) the economic branch focused in this activity is conformed by two different codes of activity: Water supply, treatment and distribution carried out by the public administration and Water supply, treatment and distribution carried out by the private administration.

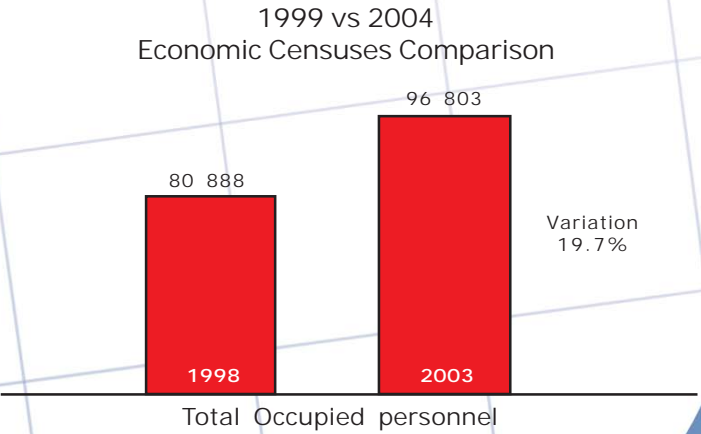

The 2004 Economic Censuses, reported 2,366 economic units related to water activities located across the whole country. Considering those institutions which conduct water supply, treatment and distribution activities, Oaxaca was the state showing the highest percentage of economic units (22.1%) that is, 524 units. It is important to mention that in most states these institutions are organized by municipalities, so under this criteria, the second and third most representative states are Puebla and Veracruz de Ignacio de la Llave reporting 9.5 and 7.8% respectively.

Regarding to the total occupied personnel, this economic activity reached 96,803 people in 2003, it is 19.7% higher than the data observed in the previous census.

From the total occupied personnel in 2003, 30.6% is settled in only three states: Mexico (12.9%), Distrito Federal (12.3%) and Veracruz de Ignacio de la Llave (5.4 per cent).

Talking about the total gross production, Distrito Federal accumulated the highest production (23.3%); followed by Mexico, Baja California, Puebla and Nuevo Leon, which together have a 48.2% of production.

In the item of fixed assets, 33.2% was reported by Nuevo Leon, Jalisco 11.9%, Puebla 8.4%, Baja California 4.4% and Tamaulipas 4.3 per cent.

Total occupied personnel

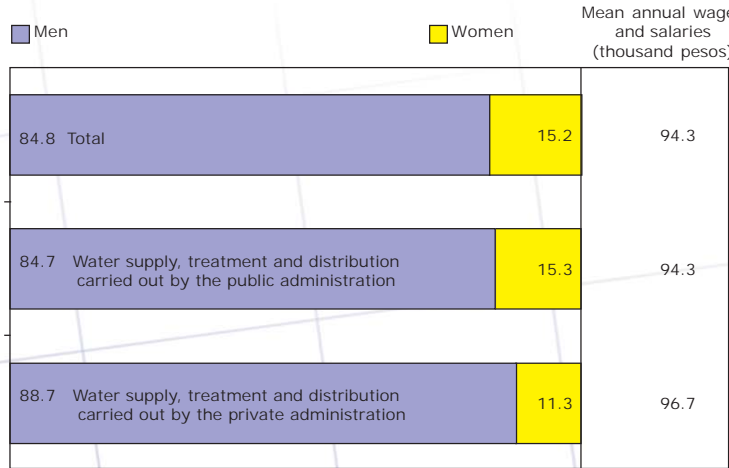

The Water supply, treatment and distribution economic subsector, registered higher men participation, among its occupied personnel, by grouping 84.8% and the remaining 25.2% were women.

Water activities carried out by the Public Administration provided work to a higher percentage of women, who mainly conducted administrative tasks, reporting 15.3% from the total occupied personnel.

The two classes of activity in the private administration reported a lower percentage of women employed and the highest mean annual wages and salaries.

In absolute terms, from the 96,803 occupied employees there were 82,086 men and 14,717 women engaged.

Total occupied personnel by gender, 2003
(Percentages)

Absolute Data

Total occupied personnel	Men	Women
96 803	82 086	14 717

Wages and salaries by state

Wages and salaries include the values of any social contributions, income taxes, etc. paid directly by the employee and all those payments currently paid by the employer on behalf of the employee including goods and services.

Employees hired in water supply, treatment and distribution sector got an annual payment of 94,271 pesos, however, Queretaro de Arteaga reported 193,000 pesos, Baja California 178,800 pesos and Chihuahua 174,000 being these three ones the most representatives states.

Fixed Assets

Having a formula between total occupied personnel and fixed assets results in the average of fixed assets per each person employed. Nuevo Leon was the state that reported the highest average, being 3,951,000 pesos per employee, followed by Puebla reporting 1,385,000 and finally Jalisco with 1,244,000 pesos. These three states were the most representative of the sector.
