

Andrew Blumberg is assistant professor of mathematics by University of Texas at Austin and editor for the Journal of Topology.

He was an NSF postdoctoral fellow from 2005-2009 at Stanford, with a year's stint as a member at the Institute for Advanced Study in 2007-2008. Before that, he was a graduate student in at the University of Chicago, where he finished a Ph.D. in 2005.

He works primarily in homotopy theory and algebraic topology, with a particular focus on algebraic K-theory (and related objects). He's also interested in equivariant stable homotopy theory.
