**Kabeli Mefane:** Transforming and Modernizing National Statistics Systems: Leaving No One Behind

**Malathi Ponnusamy:** Building a National Data Infrastructure for Malaysia's Future: A Focus on Data Production and Innovation

**Malgorzata Tarczynska-Luniewska\*:** Enterprises' ESG practices and sustainable development: challenges and opportunities for official statistics.

**Zhihua Tang:** Opportunities and Challenges Faced By National Statistical Offices In The Digital Era: The Recent Experiences From China

**Fiona Dawe:** Driving innovative and ambitious statistical change with user needs at the core

\*Work presentation not available or non-existent

# Transforming and Modernizing the National Statistics System by Kabeli Mefane, Lesotho Bureau of Statistics

# Outline

Background

Africa's Five Thematic Areas for Transformations

How Integrated Systems (IS) and New Technology (NT) are core to five thematic areas

IS and NT significance, benefits, and applications within NSS

Success stories of Transformation and Modernization in Africa

Inclusivity in statistical production

Challenges and Opportunities

## Background

National statistics systems (NSS) in Africa serve as the backbone of evidence-based policymaking, providing critical data for informed decision-making and monitoring progress toward development objectives. “However, many African countries face challenges such as outdated methodologies, inadequate coverage, and limited data accessibility, which hinder the effectiveness of their NSS”. Therefore, NSSs in Africa have to improve their approach to generating statistics. In light of these, the Statistical Community in Africa has undertaken to pursue programs that are geared toward the transformation and modernization of their systems.

Coordination  
and  
Partnerships

Capacity-building  
and training

**Africa's Five  
Thematic Areas for  
Transformations**

Communication  
and Advocacy

Innovation and  
modernization

Integrating  
statistical  
systems

**How  
integrated  
systems (IS)  
and new  
technology  
(NT) are  
core to 5  
thematic  
areas**

IS facilitate seamless coordination  
NT enables real-time collaboration and data  
sharing

IS allow for the efficient dissemination while NT  
supports interactive data visualization and  
storytelling

IS streamlines the process of statistical  
production, NT automates repetitive tasks

IS facilitates the integration of new data sources.  
NT, including big data analytics, AI, and ML,  
enables innovative approaches

Technology-enabled training programs and  
capacity-building initiatives enhance the skills  
and capabilities of NSS staff

# Significance, Benefits, and Application within NSS

- Enhanced Data Quality
- Increased Efficiency
- Inclusivity and Equity

Significance

Applications

Benefits

- Real-Time Data
- Improved Decision-Making
- Cost-Effectiveness

- Mobile Data Collection
- Big Data Analytics
- Geospatial Analysis
- Cloud Computing
- Machine Learning and AI Data Visualization Tool
- Digital Survey Tools

**PRESENTED BY: MALATHI PONNUSAMY**

# OUTLINE

1. Introduction
2. Strengthening of the national statistical system (SNSS)
3. Data Governance
4. Data Integration
5. Innovation
6. Modernization in data collection & storage
7. Modernization in data dissemination
8. Conclusion

# INTRODUCTION

## DOSM as the Official National Statistics Agency

The main government agency entrusted and responsible for **collecting, interpreting** and **disseminating** timely and up-to-date statistics.

**1949**

Statistics Malaysia was established in 1949 under the provisions of the Statistics Ordinance 1949 and was known as the Bureau of Statistics

**1965**

The Bureau of Statistics has changed its name to the Department of Statistics Malaysia and operates under the provisions of the Statistics Act 1965.

**2018**

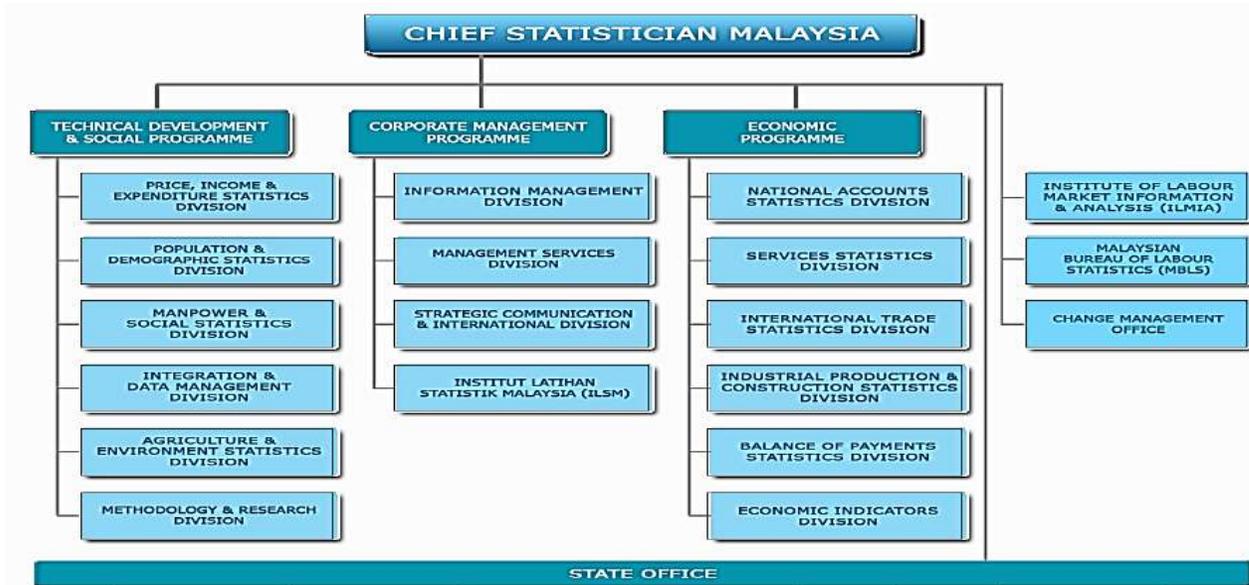

The Department of Statistics Malaysia is the main government agency under the Ministry of Economic Affairs

**2020**

10 March 2020, the Department of Statistics Malaysia has been placed back under the Prime Minister's Office - regulated by the Minister in the Prime Minister's Office (Economy)

**2023**

In parallel with the formation of the Unity Government, the Department of Statistics Malaysia is the main government agency under the Ministry of Economy

## SOURCE OF POWER

  
 LAWS OF MALAYSIA  
 Act 415  
 STATISTICS ACT 1965  
 (REVISED-1989)  
 Under the Statistics Act 1965 (Revised - 1989), the functions of DOSM [Section 2] are:  
 To collect and interpret statistics for the purpose of formulation or implementation of government policies....

**Statistics Act 1965  
(Revised-1989)**

  
 LAWS OF MALAYSIA  
 REPRINT  
 Act 16  
 CENSUS ACT 1960  
 Incorporating all amendments up to 1 January 2006  
 Under Census Act 1960:  
 The Yang di-Pertuan Agong may, by notification in the Gazette, from time to time direct that a census to be taken throughout Malaysia of the Population, Agriculture, Trade, Labor, Industry, Commerce....

**Census Act 1960  
(Revised-1969)**

# INTRODUCTION

## IMPORTANCE OF INTEGRATION, MODERNIZATION & INNOVATION

### Data Overflow from Multiple Sources

- Data as a commodity is of high value and available in various agencies and platforms.
- Requires efficient and integrated data resource management.
- Requires a system framework towards holistic statistical production.

**SNSS**  
Continuous modernization and innovation efforts towards effective service delivery

### Technological Revolution

- Support to change the integration platform and coordination of high volume data that is more efficient and effective.
- Parallel to the era of digital government and big data for the processing, structuring, analysis and handling of data in a better and effective way and save costs.

### Environmental Change

- The uncertainty of the global situation requires preparedness in providing the latest inputs.
- Rapid economic evolution and business models.
- Increasingly complex social and environmental management.

### Data Requests Are Increasingly Complex

- The need for complex and granular information down to the smallest geographic level and according to various specific demographic characteristics.

# STRENGTHENING THE MALAYSIA STATISTICAL SYSTEM

The strengthening of the National Statistical System will have a positive impact, including ensuring the availability of more comprehensive data in the government sector when formulating short-term and long-term national policies.

## 1 National Statistics and Data Council

Formation of a council which acts as the highest advisory body in giving direction to the national statistical system and the coordination of information at national level

## 2 Amendments of Statistics Act 1965 (Revised 1989)

Empower and support the strengthening of the National Statistical System

## 3 DOSM as the Central Agency of Statistical Services

Responsible in coordinating and controlling the production of statistics from Ministries, Departments and government agencies

## 4 Chief Data Officer (CDO)

As an agent of the coordination mechanism, access and cooperation of data sharing between agencies

5

## National Big Data Analytic Centre (NBDAC)

Establish NBDAC as a service center for the development of national big data analytics products across sectors

6

## Change Management Office (CMO)

Establish the CMO that set action plan and strategy, execute and monitor the implementation of the Strengthening of NSS

7

## Capacity Building:

- Organizational Restructuring
- Subject Matter Expert
- Statistics Intelligence Centre of Excellence

Strengthen human resources, career advancement of subject matter experts and building capacity for developing statistical literacy

# DATA GOVERNANCE : CORE AREAS

There are 6 core areas for Data Governance Framework In Malaysia

## 1. People and Culture

- Chief Data Officers (CDOs)
- Statistical Competencies Development Programme (SCDP)
- Data Scientists SAS
- Big Data Analytics Core Team
- Subject Matter Experts (SMEs)

## 2. Policies, Standards and Guidelines

- Statistics Act 1965 (revised 1989)
- Census Act 1960
- DOSM Strategic Plan
- General Statistical Business Process Model (GSBPM)
- Generic Activity Model for Statistical Organisations (GAMSO)
- Statistical Business Architecture (SBA)
- Micro Data Dissemination Policy

## 3. Data Quality

- Generic National Quality Assurance Framework (g-NQAF)
- Sound Methodology

## 4. Technology

- National Enterprise-Wide Statistical System (NEWSS)
- Integrated Population Census System (MyIPCS)
- StatsBDA
- StatsDW
- StatsDigital
- Stats Geoportal
- OpenDOSM Next Gen.
- Dashboards

## 5. Data Protection & Privacy; Ethics; Security

- Public Sector Data Sharing Policy (DPDSA)
- National Data Sharing Policy (NDSP)
- Personal Data Protection Act 2010 (PDPA)

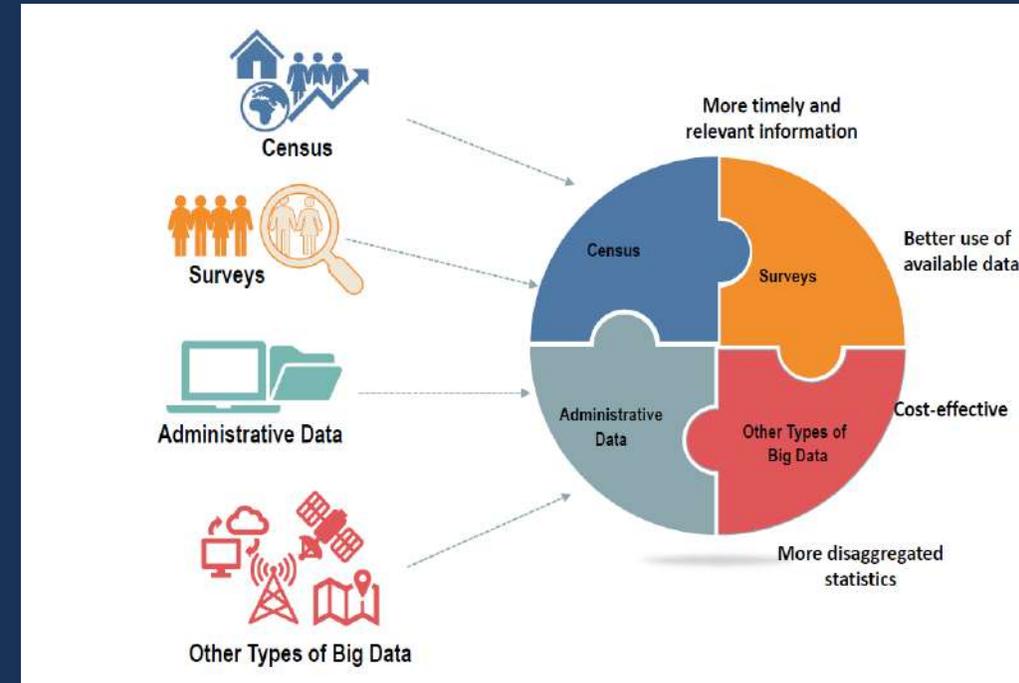

## 6. Partnership

- MoU's for Data Sharing
- Collaboration with Agencies

Source: United Nations' "Data Strategy of the Secretary-General for Action by Everyone, Everywhere, 2020-2022"

# INTEGRATION

# STRATEGIC COLLABORATION

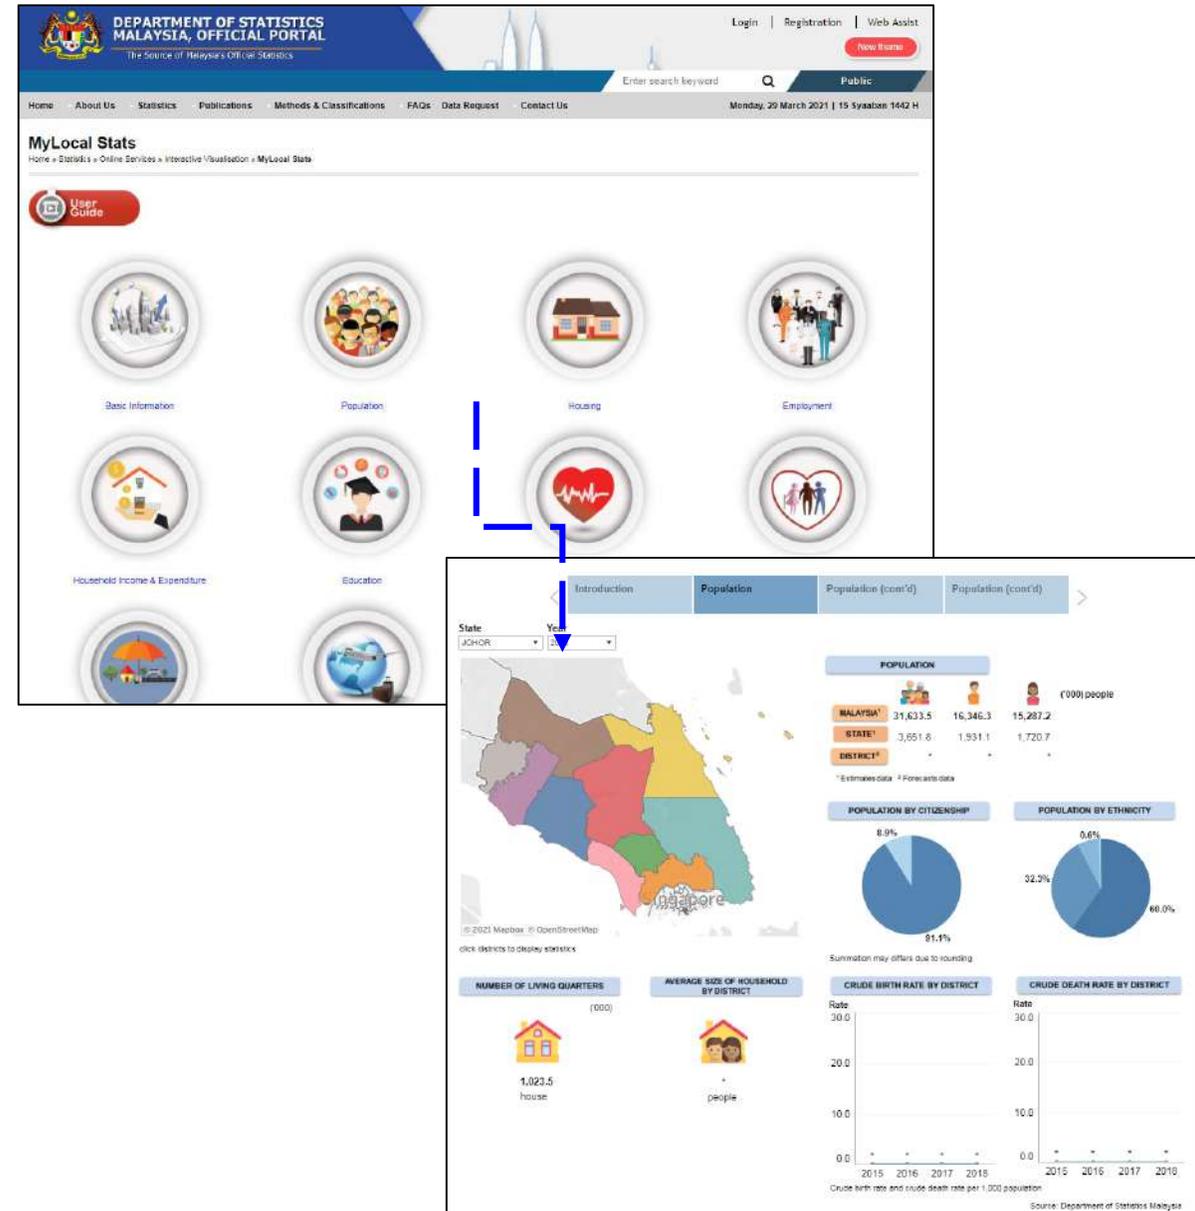

**6**  
**STRATEGIC COLLABORATION**

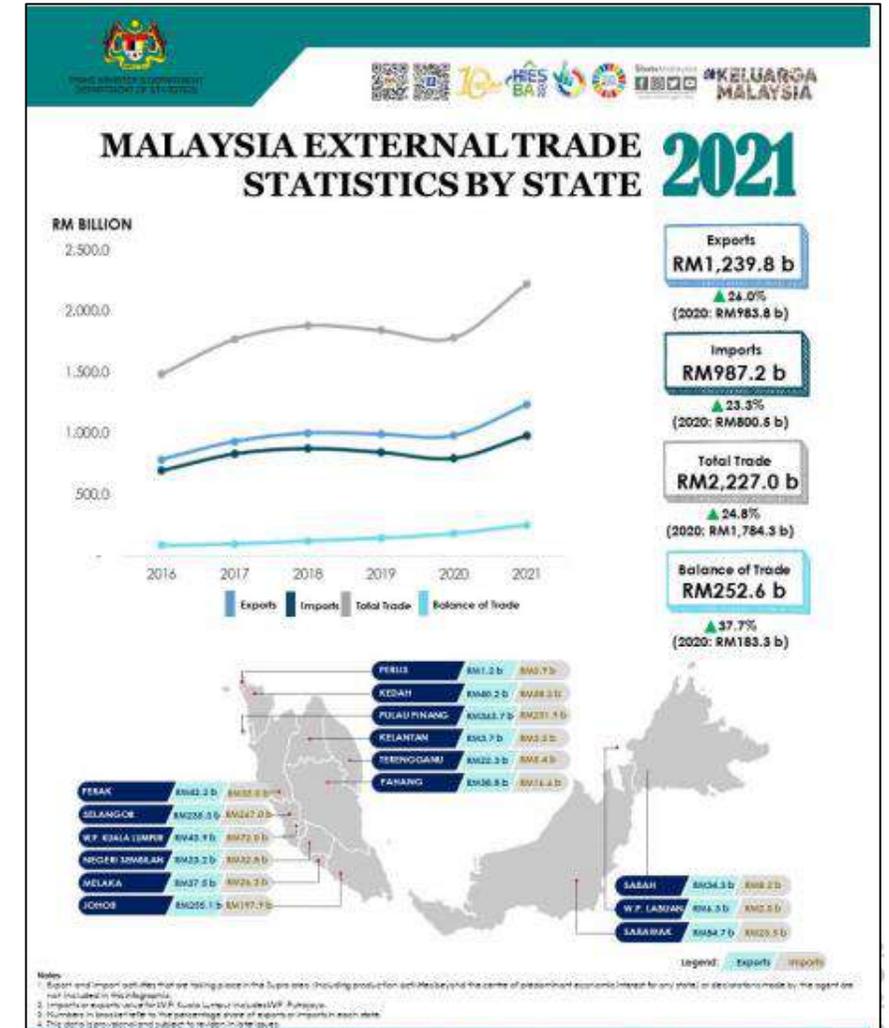

# My Local Stats

- **My Local Stats**, is a publication of economic and social statistics which is comprehensive at the district level combines survey data and other types of auxiliary data (census and administrative data).
- Covering **20 Indicators: basic information; population; housing; energy use; household income and expenditure; education; health; welfare services; public safety; communication and recreation; internet and social media; basic facilities; gross domestic product; consumer price index; exports and imports; agriculture; mining and quarrying; manufacturing; construction and services.**
- The compilation is **based on Handbook on Social Indicators** which was published by the United Nations Statistics Division (UNSD) ([https://www.dosm.gov.my/v1/uploads/images/Online%20Services/MyLocal%20Stats/MyLocalStats Web Guide H D.mp4](https://www.dosm.gov.my/v1/uploads/images/Online%20Services/MyLocal%20Stats/MyLocalStats%20Web%20Guide%20D.mp4)).

# MALAYSIA EXTERNAL TRADE STATISTICS by STATE

- Presents statistics on annual Malaysia's External Trade pertaining to imports and exports at the state level according to major / selected commodities and country of origin and destination for the period of 2019 to 2021.
- This statistics are generated from **Trade Enterprise Characteristics (TEC)** module under Statistics Big Data Analytics (STASBDA), Department of Statistics Malaysia which is an initiative to integrate two different statistics domain, namely, international merchandise trade database and Malaysia Statistical Business Register (MSBR) (<https://statsbda.dosm.gov.my/>).
- This statistics provide imperative information to policy makers in formulating strategic planning for states involved in international trade and dominate Malaysia's exports (<https://newss.statistics.gov.my/newss-portalx/ep/epLogin.seam>).

# POPULATION & HOUSING CENSUS 2020

- Administrative data will be integrated with census data to **complement and enrichment** of census data.

## COMPLIMENT CENSUS DATA

- Prison Department**  
Prisoner
- National Anti Drug Agency**  
Residents of Drug Rehabilitation Center
- Welfare Department**  
Homeless
- Ministry of Health**  
Patient (eg: Mental Health)

### MyCENSUS 2020

Population and Housing Census of Malaysia (MyCensus) is conducted every 10 years since the establishment of Malaysia. MyCensus 2020 is the sixth census.

### PURPOSE

To obtain comprehensive and detailed stock and profile of population and housing at a particular period as a benchmark for demographic and socio-economic characteristics of the population.

### LEGISLATION

- Census Act 1960 (Revised-1969)

## ENRICHMENT CENSUS DATA

- Civil Service Department**  
Government Staff (HRMIS)
- Welfare Department**  
Disability people
- Ministry of Women, Family and Community Development**  
Number of residents in Institutional living quarters
- National Registration Department**  
Citizen resident
- Jabatan Kemajuan Orang Asli**  
Aborigines
- Pos Malaysia**  
House Address
- Tenaga Nasional Berhad**  
House Address
- Telekom Malaysia**  
House Address
- Election Commission of Malaysia**  
Registration of Voter
- Immigration Department**  
Non-Citizen resident
- Lembaga Tabung Haji**  
Number of pilgrims and Tabung Haji depositor
- Department of Survey and Mapping**  
Geospatial information
- RISDA**  
Small estate holder
- Implementation Coordination Unit**  
eKasih data (financial assistance)
- Ministry of Health**  
Number of nurses dormitory
- Income Tax**  
Tax Payer
- Kementerian Pendidikan Malaysia**  
Higher Institution Student

# THE AGRICULTURAL ANALYTICAL SYSTEM

- This new platform was created to facilitate access and for the purpose of analysis of national as well as local-level agricultural data
- The Agricultural Analytical System is an initiative of the Department of Statistics Malaysia (DOSM) under the **Public Sector Data Analysis (DRSA) 2.0 project**.
- This platform displays agriculture statistics that focused on **four (4) products** namely oil palm, rubber, poultry (chicken and duck) and fisheries (marine and aquaculture).  
(<https://drsa-agriculture.netlify.app/index.html>).

# PADU: CENTRAL DATABASE HUB

Main Introduction Frequently Asked Questions Gallery Contact us

PADU Official [Login](#)

## INTRODUCTION TO PADU

### Introduction

PADU contains profiles of individuals and household members including citizens and permanent residents aged 18 years and over in Malaysia. This profile information will be updated regularly through the integration of administrative data from various sources. Through this ecosystem, people can continuously improve and update information in the PADU system.

### PADU Objectives

1. Providing a secure, comprehensive and "near real time" main country database for regular analytical production and digitization without leaks.
2. Basic formulation and process of making decisions based on data.
3. Balancing the fiscal position through targeted policy implementation.

### PADU's goal

1. Increase the efficiency of the Government service delivery system.
2. Carry out confirmation in the use of limited resources.
3. Carrying out strengthening of the social system through increasing economic and people's welfare.
4. Close the socioeconomic gap by meeting people's needs and balancing development.

## STRATEGIC COLLABORATION

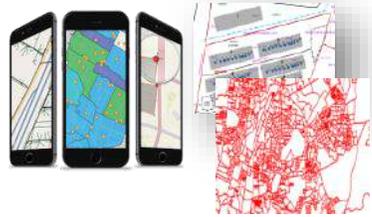

# INNOVATION

- ❑ Unlocking spatial insights: GIS technology advancements in Malaysia
- ❑ Big data for official statistics: Malaysia's experience
- ❑ Modernization in data collection and data storage

# BIG DATA FOR OFFICIAL STATISTICS: MALAYSIA'S EXPERIENCE

## Statistics Big Data Analytics (STATSBDA)

### Trade by Enterprise Characteristics (TEC)

involves integration of high volume of structured data with fuzzy matching technique

### Price Intelligence (PI)

modernizing data collection method with web crawling technique

### Public Maturity Assessment on Official Statistics (PMAOS)

uses text mining technique for sentiment analysis

### OpenDOSM

### Kawasanku

### Nowcasting Malaysia's GDP with Machine Learning

### JOB MARKET INSIGHTS

### Informal Sector And Micro Industry (SIIM) Database

Integrating administrative data with non-traditional sources like social media, aiding government decision-making...

### Earth Observation (EO)

Using satellite imagery for environmental insights and improving official statistics' quality.

### Social Protection Data Management

DOSM leads in preparing a centralized Social Protection Database, enhancing social protection policies

### FUTURE RESEARCH

### Mobile Positioning Data (MPD)

a dynamic proxy indicator assessing economic activity and human commuting patterns.

# MODERNIZATION IN DATA COLLECTION

**1** Pra-Pengumpulan Data

Menjalankan opyen sampel, saiz dan pemilihan sampel serta penyebarasan parameter dengan menggunakan algoritma pemilihan sampel.

**2** Pengumpulan Data

Pengalihan sampel. Menjalankan kerja pungenutan data.

**3** Prosesan Data

Menjalankan tangkapan data secara dalam atau luar talian serta memantau maklumat terkini dari agensi yang lain untuk merangka data.

**4** Analisis & Laporan

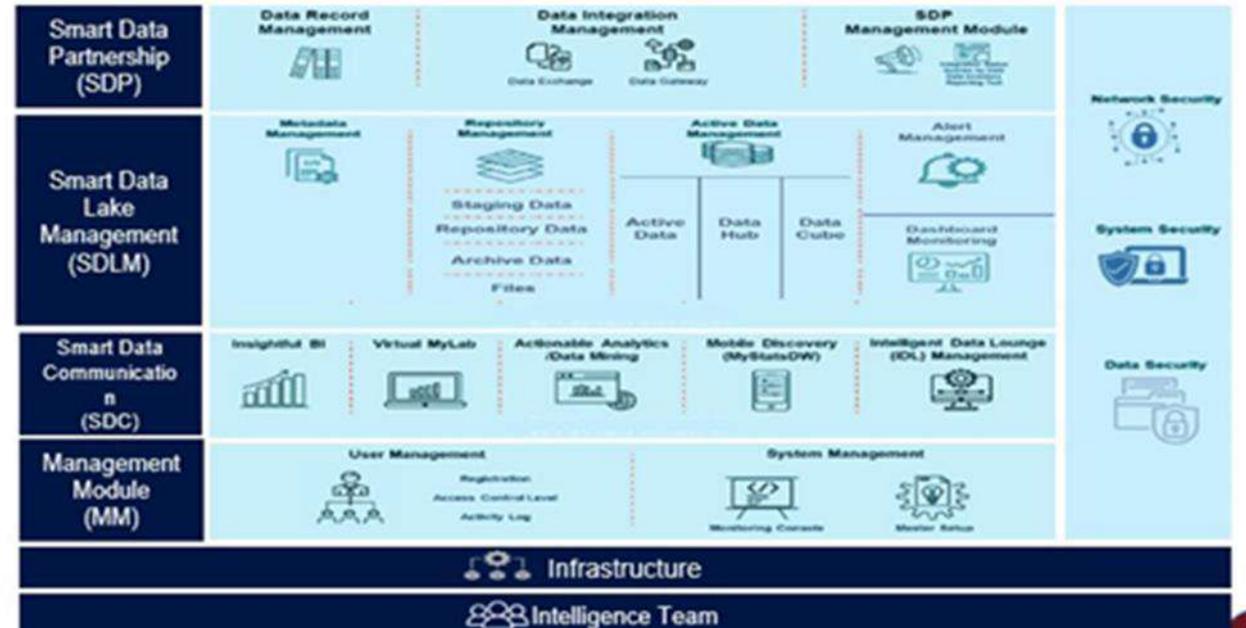

Penilaian dan menjalankan analisa keatas kepulauan yang diperolehi dengan menggunakan beberapa laporan dan peralitan menganalisa serta peta.

**5** Penyebaran

Membuat pertanyaan dan mengemaskini maklumat untuk tujuan penyebaran dengan menerbitkan laporan dengan pantas.

StatsDW will facilitate the storing, retrieving, processing activities of data for more efficient organising, administration, governing and securing of datasets. Now, StatsDW has enable DOSM to become the central data repository platform to other government agencies and has integrate with several government agencies system through API for data sharing.

# MODERNIZATION IN DATA DISSEMINATION

## Mobile application

Both of these applications can be downloaded via the Apps Store (IOS) or Play Store (Android) with the search words **DOSM** and **BizCode**

### DOSM

Statistics at the district level in the form of infographics that are easier to understand by all levels of society. This information is introduced through the mobile application of the interactive system. MyLocal Stats will help users to access statistics up to the district level for local development planning.

Annual Release Calendar (ARC) DOSM

MyLocal Stats

### BizCode

A platform for sharing code and statistical classification activities based on international classification standards. BizCode@Stats makes it easy for users to get codes and information interactively and mobile.

# CONCLUSION

1. **Statistics, spearheaded by DOSM, are pivotal for shaping economic development.**
2. **DOSM's continuous efforts enhance the effectiveness of the National Statistical System.**
3. **Collaborative initiatives aim to transform public perception of statistics, emphasizing their significance.**
4. **The implementation of centralized databases, partnerships, and accessibility measures ensures the integration of reliable data.**
5. **Continuous technical expertise, benchmarking of best practices, and capacity building are crucial for producing sophisticated statistical products.**
6. **Investments in human resources and technology, particularly in data science, analytics, and skilled data scientists, are necessary for sustainable progress.**

# Thank you

A white rectangular box containing a collage of logos and QR codes. At the top left are the SDG 2030 logo and the "MALAYSIA MADANI" logo with the dates "20 OCT 2016 - 2030". Below these are logos for "AGRICULTURE CENSUS 2024", "BANI EKONOMI 2023", and "PSSN". At the bottom, there are two QR codes, social media icons for Facebook, Instagram, X, and YouTube, and the text "StatsMalaysia www.DOSM.gov.my".

# CASE 03 Remote Sensing Application

## Background

For a long time, the household interview has engaged in China's agricultural statistics to obtain survey information.

With the rapid development of China's economy and society, this survey method faces more and more challenges.

## How to address these issues?

Need to strengthen the ability to collect data directly from the source (ground) .

Conducted the application research and practice using remote sensing big data during the past 20 years.

# CASE 03 Remote Sensing Application

A new survey system

Establish a “space-air-ground” three-dimensional modern agricultural statistical survey system

a new survey system

# CASE 03 Remote Sensing Application

Remote sensing satellites form a "space based" survey capabilities

Drones complement the "in-air" survey capabilities

PAD solidifies "ground" survey capabilities

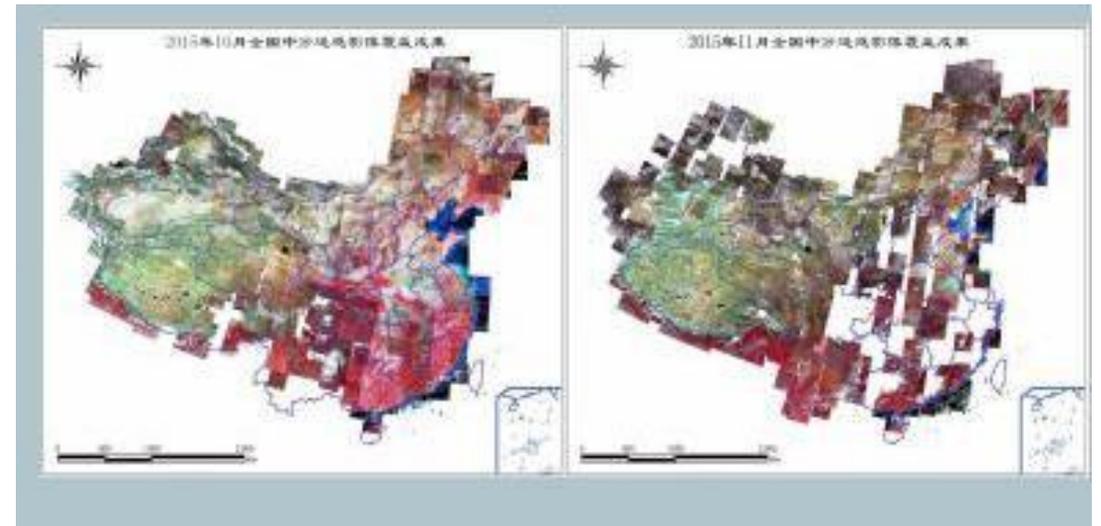

# CASE 03 Remote Sensing Application

## A new survey system

Agricultural survey has entered a new stage of "ground survey" from "household survey".

- Combination of satellite, drone, and PAD
- Needs of ground survey in various survey scenarios have been met

# CASE 03 Remote Sensing Application

## Specific operational applications

### Established a wide coverage of "ground survey" network

- Automatically recognize drone images.
- A total of nearly 9,000 survey villages have been established
- Three randomly selected grid of 200m × 200m in each sampled village.
- Almost 1.01 million plots were randomly selected for survey.

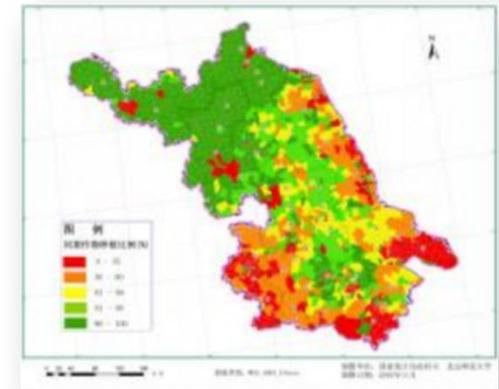

# CASE 03 Remote Sensing Application

## Specific operational applications

### Measure the acreage of large-scale major crops

- Using satellite remote sensing images with a spatial resolution of ten to sixteen meters.
- According to the planting characteristics of crops in different regions, suitable remote sensing image classification methods are adopted.
- Rice, wheat, corn, soybean, cotton and etc.

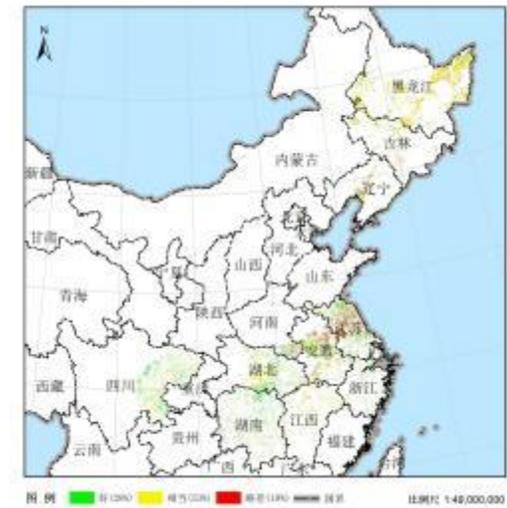

# CASE 03 Remote Sensing Application

## Specific operational applications

### High-frequency monitoring of main crop growth.

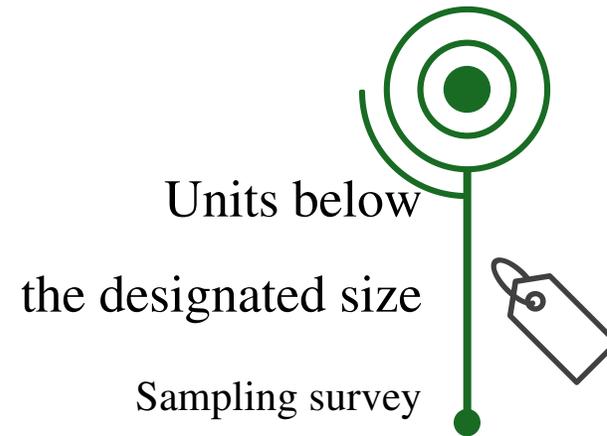

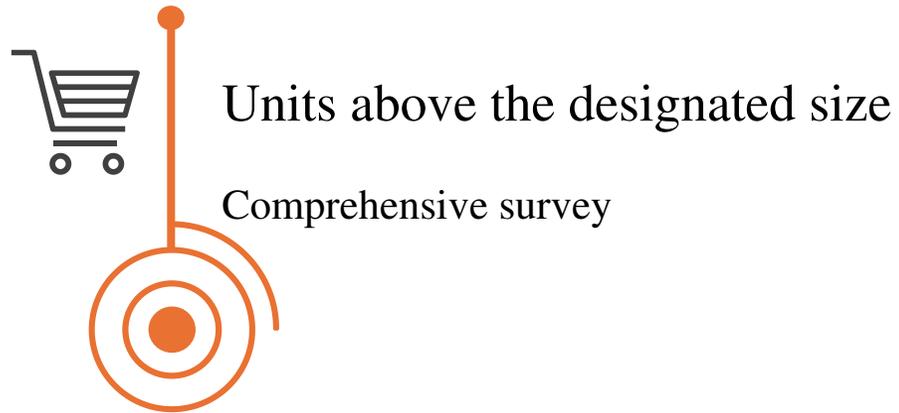

- Monitor the growth of main crops 2-3 times per month during the key growth periods.
- Reflect the overall growth situation, timely helping crop growth judgment and yield estimation.

## Development of Third-party Payment

# CASE 04 The Application of Third-party Payment Data in Retail Sales Statistics

## Third-party Payment Business Modes

1 By transaction type

2 By fund flow  
C2C、C2B、B2C、B2B

C2B: Consumers pay to merchants when shopping or enjoying services. It is the primary transaction type of personal retail payments.

3 By payment method

# CASE 04 The Application of Third-party Payment Data in Retail Sales Statistics

# CASE 04 The Application of Third-party Payment Data in Retail Sales Statistics

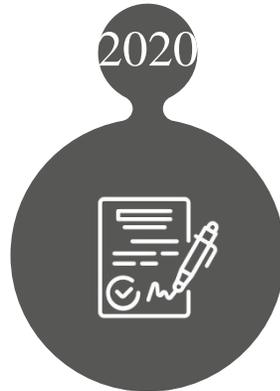

Implementation of the Third-party Payment Survey

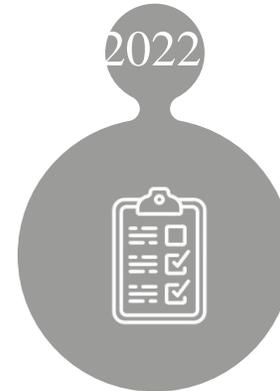

Establishment of a "Consumption Statistics Big Data Joint Laboratory"

Research on the application of third-party payment data

Deepening the application of Third-party Payment data

# CASE 04 The Application of Third-party Payment Data in Retail Sales Statistics

## Implementation of the Third-party Payment Survey

### Purpose of the survey

- Transaction volume
- Transaction structurethe market
- Development situation

### Scope of the survey

Licensed non-bank payment institutions.

### Content of the survey

Transactions of goods and services provided by authorized merchants.

- Payment transaction amount,
- Number of payments,
- Number of authorized merchants,
- Data grouped by product and service categories.

# CASE 04 The Application of Third-party Payment Data in Retail Sales Statistics

Establishment of a "Consumption Statistics Big Data Joint Laboratory"

Supplementing the evaluation of retail sales of consumer goods below the designated size

Supplementing data sources of service consumption market statistics

- Tracking and monitoring transaction data
- Measuring and calculating monthly growth of turnover

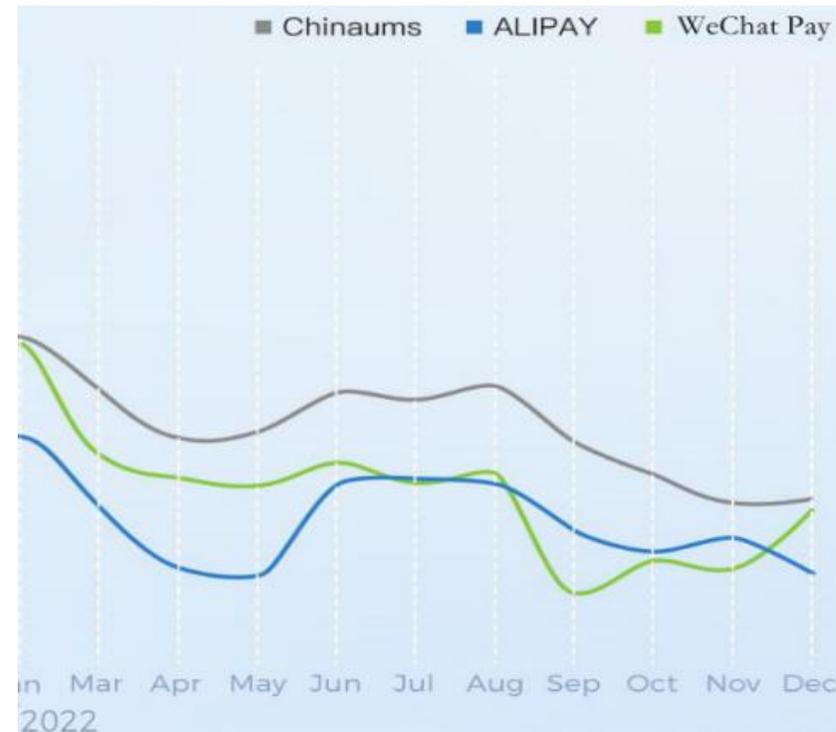

Monitoring holiday consumption market and carrying out related statistics

# CASE 04 The Application of Third-party Payment Data in Retail Sales Statistics

Supplementing the Evaluation of Retail Sales of Consumer Goods below the Designated Size

Figure:  
Growth rate of monthly turnover of sample merchants below designated size using third-party payment system (%)

# CASE 04 The Application of Third-party Payment Data in Retail Sales Statistics

Supplementing data sources of service consumption market statistics

Figure: Turnover Growth Rate in the Health Industry (%)

# CASE 04 The Application of Third-party Payment Data in Retail Sales Statistics

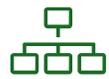

## Subject Research

Completed the research on the application of third-party payment data in retail sales statistics

Research on the application of acquiring institution transaction data in consumer market statistics (in 2023)

Research on the application of Third-party Payment data in consumption market statistics based on machine-learning Algorithms (in 2024)

# Driving innovative and ambitious statistical change with user needs at the core

Fiona Dawe

# Why do we need to measure the population?

Planning and development

Public health and social care

Housing

Education

Transport

Other

# Population statistics have always evolved alongside society

1801

The first UK Census was set up to check there was enough bread production for the nation.

2021

Digital first

97% response rate  
89% of the population completed the census online, with over 50% of those on a mobile phone

# Our vision: transforming population and migration statistics

The census gives us a brilliant, detailed snapshot of England and Wales **but...**  
Accuracy declines from census day. Local detail quickly out-of-date

Alternative data sources could provide **more frequent, inclusive, and timely statistics:**

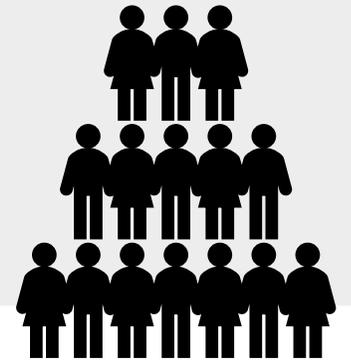

Administrative data will be at the core of this system.

More local information every year, not just once a decade

More responsive to society's changing needs

Population estimates: more consistent level of detail and accuracy over time

Migration estimates: observed patterns, not stated intentions

# Consultation on the future of population and migration statistics in England and Wales

Ran from June to October 2023

Proposals included:

- Improved population statistics
- Estimates of how and where we live and the make-up of our communities
- Estimates comparing different attributes at local level
- Analysis of outcomes over time

Do these meet your needs? What needs don't they meet?

# Raising awareness

- Conferences
- Webinars
- Meetings
- Events
- Roundtables
- Emails
- Newsletters
- Social Media

# 706 Responses

Sector	Count of question “What sector does the organisation belong to?”
Individual response	366
Local government	147
Charity or voluntary	52
Central government	34
Other public body, e.g., health, transport, or emergency services	31
Business, industry or commercial	21
Academia or research	18
Religion or faith	8
Devolved administration and associated bodies	9
Other (includes sectors such as Think Tanks, Journalism, Media)	20

# National Statistician and Inclusive Data

**Inclusive Data Task Force:** An independent task force with a strategic purpose - to make a radical step-change in inclusivity of UK data and evidence

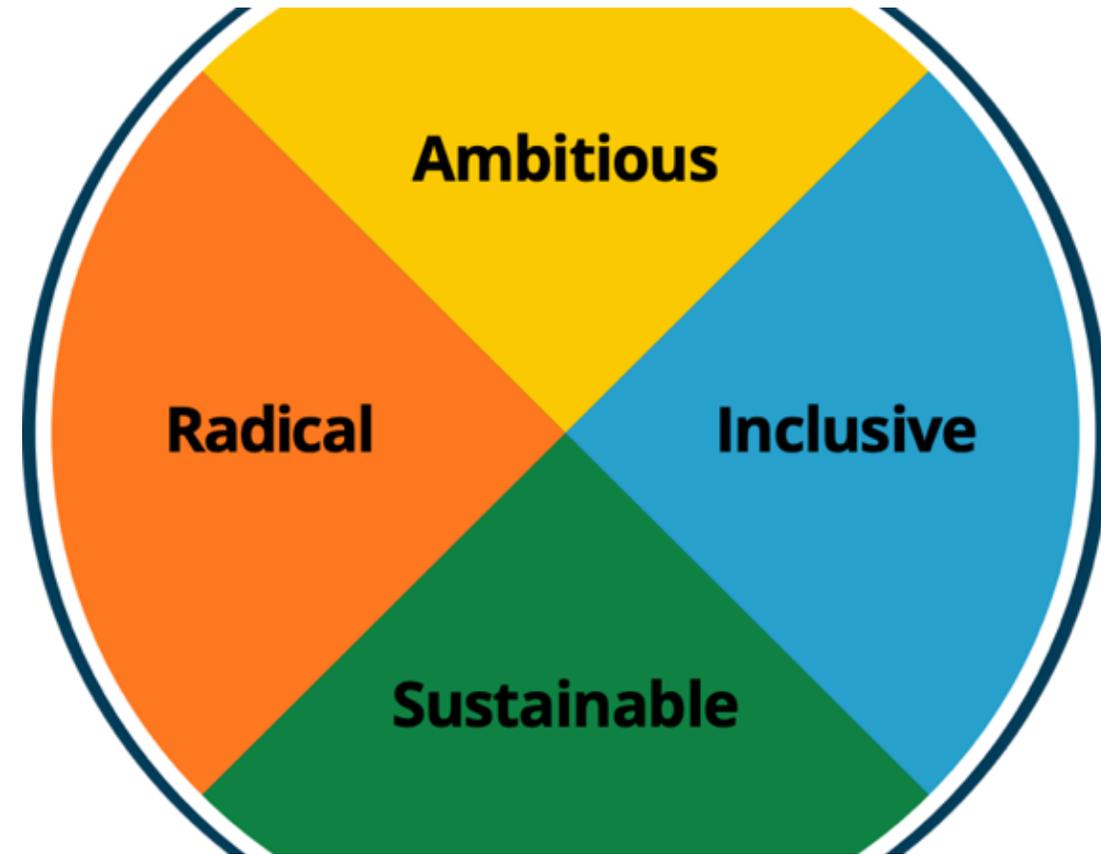

**National Statistician's Inclusive Data Advisory Committee:** monitor progress of the implementation of the IDTF recommendations and give advice on a range of issues.

**Focus on Children and Young People and Disability**

## Future innovation

- Supplementary surveys
- New administrative data sets
- Differential models
- Collaboration with Local Authorities

# Current and Future Engagement

Current Examples	Moving forward Examples
Central and Local Information Partnership (CLIP) subgroup	All those plus...
